QuickShip

Many doors inside this catalog are available as part of our QuickShip program, which means they will ship within two weeks of your standard order cutoff date. Look for the QuickShip symbol to designate these products. If all products on a page are QuickShip items, the QuickShip symbol will be at the top of that page. If only certain doors are labeled with the QuickShip symbol, then only those doors are available QuickShip. Ask your Wincore® representative for more details.

QS

Quality Production Before Production Even Begins.

To make great windows and doors, you need more than great people. You need a great place to work. And that's exactly what you'll find when you visit our advanced manufacturing facility. Skillfully designed by process managers who know how windows and entry doors should be made, every step in our manufacturing process is streamlined for maximum efficiency while allowing the opportunity for handcrafted detailing by an experienced production team. So, whether it is an order for five hundred windows or five entry doors, each and every customer is assured of quality-built, on-time orders manufactured with skill and care. Granted, there are larger manufacturers out there with even larger facilities that can make more products in a day than we can in a week. But to us, it's not about being the biggest. It's about being the best. After all, isn't that the way it should be?

Special thanks to *Window & Door* magazine for recognizing Wincore® Windows and Doors as one of their Top 100 Manufacturers.

We're Not
Only Building
Windows & Doors.

We're Building
Hope.

Wincore is proud to support Tough Enough to Wear Pink™, a non-profit organization diligently working toward fundraising for breast cancer research. Which means every window and door we make helps bring us one step closer to a cure. Find out more at www.wincorewindows.com.

Wincore® Entry Doors – Everything You Want And Then Some.

Beauty

You never get a second chance to make a great first impression. That's why Wincore® Entry Systems are thoughtfully designed with enhanced details to greet your guests with classic elegance and style.

Durability

At Wincore®, we pride in delivering entry systems that feature only top quality construction, made with the finest materials. Every one backed by our Lifetime Limited Transferable Warranty.

Security

Your security and safety is one of our main concerns. That's why we chose to utilize only the most respected names in hardware like Schlage™ for all handlesets and locking mechanisms.

Energy Efficiency

Today, energy efficiency is more important than ever. That's why Wincore® Entry Systems are ENERGY STAR qualified.

Decorative Glass

Decorative glass achieves visual character through aesthetic imperfections that mimic hand-made sheet glass of centuries past – each exhibiting textural waves and striations, air bubbles and a variety of other natural effects.

- Artistically designed patterns
- Assembled by skilled craftsmen
- Precise cutting, mitering and soldering
- Hand-made glass panels

Proud To Be Called An ENERGY STAR® Partner

Today, many companies promise to make energy efficiency a priority. And when you see the ENERGY STAR® symbol, you're guaranteed those promises are true. As an ENERGY STAR® partner, under the guidance of the U.S. Environmental Protection Agency (EPA) and the Department of Energy (DOE), Wincore® has agreed to:

Build energy-efficient products that have been tested and certified in accordance with the guidelines set forth by the ENERGY STAR® Partnership program.

Manufacture each product with attention to increasing overall energy efficiency.

Inspire trust in the ENERGY STAR® symbol through quality, high-performing products.

Additional information about ENERGY STAR® can be found at energystar.gov.

Door Textures

Fiberglass doors are available in three finish textures. Not all door styles or sizes are available in all textures.

SMOOTH

Plymouth handleset in Satin Nickel.

Composite Frame System

Composite door frames are an innovative new alternative to traditional finger-jointed wood door frames. Research proves full-length composite door frames combine the strength and convenience of wood door frames with enhanced properties that make them moisture- and insect-resistant. The composite, rot-free polyfiber door frame will last years after wooden frames have deteriorated. Composite polyfiber frames will never absorb moisture, splinter or rot like wood door frames, or rust like metal door frames. And on Wincore® Fiberglass Entry Doors, they are a standard feature.

- Low maintenance
- Resistance to wear, splitting and impact
- Excellent nail and screw holding strength
- Great paint, stain and glue adhesion
- Can be installed below grade or to masonry
- Does not promote mold or mildew
- Moisture and termite proof material
- Lifetime warranty for rot, decay and insects

Wood Frame

Composite Frame

The Only Thing More Beautiful Than The Outside Is The Inside.

Patented Hydroshield Technology™

Exclusive HydroShield Technology™ features fiberglass reinforced door skins, full-length composite stiles and composite top and bottom rails to prevent water infiltration on all six sides.

Composite Top And Bottom Rails

Additional non-porous protection keeps water from seeping into the door and helps prevent mold and mildew.

Fiberglass Reinforced Skin

Fiberglass is unmarred by the wear and tear of everyday use and is unaffected by moisture and humidity. The doors will not rot, splinter or warp like wood, and won't dent or delaminate like steel.

Full-Length Composite Stiles

Entry doors feature full composite stiles to prevent water infiltration into the door's insulation and full-length LVL to ensure the door will never warp, rot or rust.

Architecturally Correct Proportions

Beautifully detailed panels replicate traditional wood door construction to create crisper shadow lines and enhanced curb appeal.

Insulated Core

Environmentally friendly insulation is 100% CFC-free and provides a high R-value for maximum thermal protection.

Key Features

Fiberglass Entry Doors

Beautiful, Even Finish

HAPS-free paints and stains are applied by highly-trained, skilled craftsmen in a climate-controlled environment. Wincore® doors are protected with a clear coat and oven-cured for maximum durability.

Insulated Core

Entry systems feature an environmentally-friendly insulation that is 100% CFC-free to provide a high R-value for maximum thermal protection.

Improved Door Frames

Composite polyfiber frames will never absorb moisture or splinter. Wincore's standard composite frame will not rot like their wood counterpart, nor will they rust like a steel framed door.

Rot-free Brickmould

A Wincore® standard, brickmould is constructed of a durable composite material to resist rot, decay and damage from insects. Customizable up to 4".

Security Strike Plate

Where applicable, a steel security strike plate adds extra strength to help prevent forced entry.

Security Protection

Grade 1 is the highest level of security for residential deadbolts.

Dust Box

The dust box, located beneath the deadbolt strike, provides a barrier to air infiltration and also conceals the deadbolt latch.

*Photo: 2 Panel 3/4 Oval Deluxe Oak Grain door with Fontainebleau Glass.
Addison handleset in Bright Brass.*

Ball Bearing Hinges

Ball bearing hinges are standard for inswing doors – featuring four-point attachments to the door and the door frame for a lifetime of dependability. For certain applications (like French Doors), adjustable hinges are also available.

Advanced Sill Design

The sill's innovative design prevents rotting, warping or deterioration over time. The thermally broken sill includes a composite substrate and synthetic cap and nosing. Incorporating a high dam overlap cap in addition to the 1-3/8" sill height creates a tough barrier against water penetration. Door sills are available in mill finish, satin nickel and bronze.

Door Bottom Sweep

The double bulb sweep maintains maximum surface contact with the threshold rail, consistently outperforming competitive products by encapsulating both the outside and inside edges of the rail.

Weathertight Seal

Energy efficient Q-Lon weather stripping provides a weathertight seal along the sides and top of the door frame and interlocks with the Simple Solution Corner Pad ensuring the most energy efficient seal available for keeping moisture, air and dirt out of your home.

Doorlite Frame

High-performance, doorlite frames are heat-resistant and will not warp, crack or fail to adhere to the door, even in most intense climates. Most decorative glass patterns utilize the TriSys frame which locks together to conceal fasteners used to attach the glass frame to the door, resulting in a seamless frame profile with a compression seal for weather protection. Our polypropylene doorlite frame also withstands the elements and can be finished to match the door.

Doorlites

Doorlites add beauty, natural light and curb appeal to your home, but can also answer your specific needs for light control, privacy and outdoor visibility. Handcrafted decorative glass is individually unique – no two are ever alike.

Hardware

Standard hardware is manufactured by the most recognized name in entry door security – Schlage. Schlage hardware is durable, stylish and available in multiple finishes.

A Revolutionary "One Size Fits All" System That's Anything But.

Every home and entry door is different. And although adding sidelites can often turn an ordinary entry into something extraordinary, they can often present unique challenges for a precise installation. That's why Wincore Entry Systems feature a completely customizable system to ensure a super strong, tight fit.

Jamb Options

All Wincore® entry doors have a standard jamb depth of 4-9/16". For deeper wall construction, extensions can be added to the jamb up to a total jamb depth of 12" for inswing doors and 8-9/16" for outswing doors. The extensions are applied at the factory in 1/16" increments.

Continuous Head & Sill

While most entry system manufacturers simply install sidelites as separate units (a method that can often result in sagging or loose sidelites after a period of time), Wincore's continuous head and sill strategy helps to retain strength and rigidity for the lifetime of the door. The head board of the entry system is one piece that continues above the mullions to provide additional strength along the entire head of the unit. Simultaneously, the one-piece sill continues underneath the mullions to provide additional strength along the entire base of the unit.

Customized Brickmould Widths

On entry system projects, the standard 2" brickmould may not be wide enough to fill the void that remains after that old door is removed. That's why Wincore® Entry Systems provides composite brickmould in custom widths up to 4". Prefinished brickmould is available in both oak grain and smooth finishes and can be stained (oak grain only) or painted.

Customize Your Mullions

Every opening is unique. Customizing the width of Wincore® doors with sidelite(s) allows you to fit your door to the opening, instead of modifying your opening to fit the door. Mullions are comprised of the same rigid composite material as the door's jambs.

Which means they will not warp or decay and are resistant to insect damage. Located between the door and sidelite(s), mullions ensure a perfect fit and are finished to match the perimeter door frame. The width of each mullion can spread from 3/4" up to a maximum of 5".

Craftsman Style

Fiberglass Entry Doors

Inspired by the design principles of American Craftsman architecture, the Craftsman Series doorlites add authenticity to a Craftsman, Mission, Bungalow or Cottage style home.

- Energy-efficient Low E glass.
- Decorative and SDL options.
- Glass size and frame profile are specific to the Craftsman series.

Each doorlite includes both clavos style plugs, which mimic the look of iron nailheads, and domed plugs – depending on the glass option selected.

For an authentic appearance, Craftsman style doors are available with an optional Dentil Shelf.

Fiberglass Patio Doors

Fiberglass Entry Doors

Craftsman Diamond

15 Lite Beveled Platinum Caming

Vista Prairie

Two Panel & Three Panel Styles

Patio Doors are available in a two panel or three panel door configuration. On two panel patio doors, one panel is operational (inswing only) while the other remains fixed. On three panel patio doors, two panels remain fixed while the remaining panel is fully operational (inswing only). A heavy duty top-hung aluminum screen frame (available in seven popular colors) with fiberglass mesh allows for virtually effortless operation. Patio doors are available with any of the decorative glass patterns that fit Full Lite door styles shown on the following pages.

*Photo: Full Lite French Door with Oak Grain texture, in Mahogany stain with Elan Glass.
Camelot handleset and deadbolt in Aged Bronze. Faux handleset and deadbolt on passive panel.*

French Double Doors

Fiberglass Entry Doors

Wincore® Entry Door systems are available as French Double Doors. When ordered in this style, Entry Doors feature a color-matched astragal pre-assembled into the door frame. When locked using the durable steel lock pins at the head and sill of the unit, the astragal keeps one panel of the entry system locked in place, while allowing the other door panel to open and close. With the astragal unlocked, both door panels open and close freely.

Easy Operation

On French Double Door Systems, Astragals are locked and unlocked with fingertip adjustments

- Minimum height 78-11/16"
- 12" & 14" sidelites only
- Limitations for 12" Venting Sidelites
 - 3/4 Lite Sidelites not available
 - 12" Full Lite Sidelites not available with any glass ordered with Craftsman style door
- 14" Sidelites available with all glass patterns

Venting Sidelite

Form follows function in one beautiful package — a continuous sill with one or two hinged sidelites. Full, wide mullions add strength and stability where sidelites are opened. Full length composite capped LVL sidelite stiles provide additional strength where multi-point lock and hinges are anchored. Full screens with fiberglass mesh are easy to remove and are available in complementary colors. Inswing configurations only. Venting Sidelites are available with blinds, internal and external grids as well as decorative glass.

Photo: Full Lite Oak Grain Door and dual Venting Sidelites with Elan Glass. All finished in Natural Oak. Flair handleset and deadbolt in Satin Nickel.

Venting & Operating Sidelites

Fiberglass Entry Doors

Operating Sidelite

When a single door is too small and a double door is too big, choose an Operating Sidelite. Operating Sidelites function just like a traditional double door through the use of an easy-to-use, thermally-broken astragal that allows the sidelite to swing open. A hinged door and hinged sidelite become a single unit with a continuous sill. All styles of sidelites (Full Lite, 3/4 Lite and 1/2 Lite) can become operational. Operating Sidelites are also available with blinds, internal and external grids as well as decorative glass.

- 80" & 78" door heights only
- 12" & 14" sidelites only

Photo: 2 Panel 3/4 Lite Oak Grain Door and Operating 3/4 Sidelite with Radiant Star Glass. Both finished in Mesa Red. Camelot handleset and deadbolt in Aged Bronze.

Photo: 2 Panel 3/4 Oval Deluxe Door with Full Sidelites. Both are Oak Grain texture with Mocha finish and Astrid Glass. Rectangle Transom with Astrid glass complements. Camelot handleset and deadbolt in Antique Brass.

Vintage Craftsman

Decorative Glass Pattern

The Vintage Craftsman design is reminiscent of the original Craftsman style with modern appeal. Featuring the obscure glass textures of eaton and double granite with a border of cotswold glass.

Ventlites

Offering the best in performance and energy efficiency, Ventlites bring functionality into an attractive design. The bottom sash of the insert unit moves smoothly up and down for optimum ventilation. The solar shield frame is UV resistant and also resists yellowing and cracking. Patented screw hole covers offer a smooth interior. Comes with screen. Available in white only.

Aluminum Blinds

Raise, Lower And Tilt

White aluminum blinds can be sealed behind tempered glass for a seamless appearance. They eliminate dusting, prevents damaged blinds, add privacy, security and light control, and help control solar heat gain. Low E glass on select sizes and easy tilt, raise and lower operation. White only. Blinds come with a ten year warranty.

Severe Weather Glass

Decorative Patterns

Laminated glass and an aluminum reinforced doorlite frame ensure that Wincore Severe Weather doorglass retains its integrity when confronted with unusually high winds and swirling debris. Laminated glass can also provide up to 30% reduction in outside noise infiltration when used in a properly sized and installed entry door system. Both the decorative and classic Severe Weather glass options are also utilized in impact-resistant entry doors.

Severe Weather Glass

Classic Glass

In addition to multiple decorative doorglass options that are certified for use in coastal areas, Wincore® Severe Weather entry systems featuring traditional classic glass sandwiched around a clear, difficult-to-penetrate laminate layer are also available. Customization is possible with multiple options including decorative grid systems and behind-the-glass blinds.

Severe Weather Classic Glass Doors With Blinds

Blinds are located behind the glass and are controlled by a single operating lever. Blinds raise, lower and tilt.

Severe Weather Classic Glass Doors With & Without Internal Grids

Internal grids on Severe Weather doorglass are 5/8" flat. Contoured grid style not available.

Turtle Glass

Thousands of marine turtles nest in U.S. coastal areas. State and local ordinances protect hatchling turtles by limiting brightness of inside-to-outside visible light transmittance. Selected styles of Wincore® Severe Weather doors featuring classic glass can include tinted grey glass that meet these requirements.

Trilennium

Multi-Point Hardware

Standard on 8/0 Doors Optional on 6/8 & 7/0 Doors

Trilennium™ multi-point hardware system provides more than just security. It offers homeowners better door closure and sealing than a single point lock. Three points latch and all three points deadbolt with a 1" throw. Deadbolts include anti-saw hardened steel pin. Includes 10-year warranty on finish, materials and workmanship.

Peace of Mind

One solid unit with three latches based on the strength of patented I-Beam construction for reliable, proven performance.

Security

Operating as one, all three latches engage when the door is closed. One movement of the thumbturn or key activates all three deadbolts. Activated, each latch is a deadbolt and cannot be compromised.

Three-Point
Locking
System

Bright Brass

Satin Nickel

Bronze

Patented Strike Rollers

Patented strike rollers and latches draw the door into perfect alignment with the jamb for a tight seal with no deflection.

Panic Release

A single downward turn of the lever releases all three deadbolts.
